### CONDEMNED BEEF IS FED TO THE INSANE

Protests Made by Official Investigators Not Heeded at Asylum.

City Bought at Highest Market Prices.

ALBANT, May 7.—Investigation of the food supplied to the 33,000 immates of the State insane hospitals, now being conducted by Commissioner Delaney of the State Department of Efficiency and Economy, is laying bare a condition which rivals the noted canned beef scandals of the Spanish-American war. Commissioner Delaney obtained the cooperation of the State Health Department and the ald of Inspectors Buckley and Snyder of the United States Bureau of Animal Industry, who recently investigated the meat, eggs and butter at the State hospitals.

When it was learned to-day that a big shipment of food supplies had just been spitals. When it was learned to-day that a big shipment of food supplies had just been received at the Hudson River State Hospital, Deputy Horgan and Chief Examiner Jackson of Delaney's department and Inspector Ferrin of the State Department of Health were sent there to make an inspection. They found twenty cases of eggs in the storehouse, which Mr. Ferrin declared were known to the trade as "culls."

Twenty per cent. at least of the eggs

Twenty per cent. at least of the eggs examined were what are known as "spots" and "rots." All of the eggs were under size and under the law could not be placed on sale as food in the city of New York. There were found tubs of butter all a year old. The original labels had been removed. The butter in one tub was found strong and rank in taste. This butter was bought in the open market at high rates and not according to any con-

tract and without specifications.
Since the Federal inspectors made their visits to the hospitals two shipments of bad beef were received at the

Says Up-State Body Approved Contract of Power Company That Works Hardships.

ALBANY, May 7. - State Commissioner of Efficiency and Economy Delaney declared war to-day on the up-State Public Service Commission for permitting the Canadian-American Power Corporation of Buffalo to capitalize a contract which imposes, it is alleged, severe hardships upon purchasers of power on this side of the Niagara River. The application of the corporation was vigorously opposed by Chief Examiner Jackson of the Efficiency and Economy Department, and after the commission decided in favor of the company he said he would start an investigation of the Public Service Commission.

Chairman Seymour Vansantvoord of the up-State commission in a statement tonight suggests that any threat of an investigation by Jackson or Delaney might properly be referred to a Grand Jury.

Residents and civic organizations of Buffalo opposed the granting of the application of the Canadian-American Power Company of Buffalo, alleging that clared war to-day on the up-State Public
